

BAHCESEHIR UNIVERSITY
CMP1401 – INTRO. TO PROGRAMMING (C)
TAKEHOME QUIZ

You will design information desk program for a neighborhood with hospitals and police stations.

- There are addition parts of buildings, user enters the number of structure and program creates random locations then adds it to the neighborhood.
- The searching parts finds the nearest structure to user's location which will be given by user. Also it gives the distance to user. (Each unit is 100 m)

HINT: Use the Euclidean distance formula:

- The third searching finds the nearest hospital to user's location and then, nearest police station to that hospital.

You can use the .c file in the zipped file. The neighborhood and print function are already defined. You don't need to define them again, use them. Advanced level structure will get more points. So use the functions, switch, while, for, etc.

See the examples and use the exe file to understand the question. If you have a question about quiz, please contact me. Follow the instructions to send your quiz. I will count the higher quiz point of you. I suggest to do this quiz for practice of final exam.

EXAMPLES :

BAHCESEHIR UNIVERSITY

TAKEHOME QUIZ

A screenshot of a Windows application window titled "C:\Users\Selçuk\Dropbox\Okul\Site\cmp1401\20142015f\Quiz_2\Answer.exe". The window contains a text-based menu for an "Information Desk". The menu options are: 1. Add hospital(s), 2. Add police station(s), 3. Find nearest hospital, 4. Find nearest police, 5. Find nearest hospital then police, 6. Show the current map, and 0. Exit. The user has selected option 3. The program then prompts "Where are you? Enter the coordinates : 10 5". The output shows "Nearest hospital : <11,4>" and "Distance : 141.42 m".

```
Welcome to Information Desk
1. Add hospital(s)
2. Add police station(s)
3. Find nearest hospital
4. Find nearest police
5. Find nearest hospital then police
6. Show the current map
0. Exit
Select an option : 3

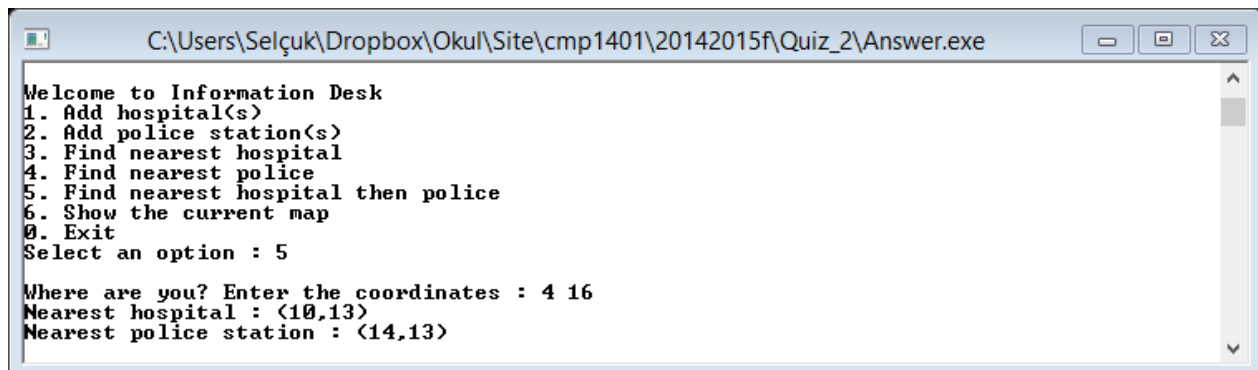

Where are you? Enter the coordinates : 10 5
Nearest hospital : <11,4>
Distance : 141.42 m
```

A screenshot of the same application window showing the second test case. The user has selected option 4. The program prompts "Where are you? Enter the coordinates : 7 19". The output shows "Nearest police station : <7,18>" and "Distance : 100.00 m".

```
Welcome to Information Desk
1. Add hospital(s)
2. Add police station(s)
3. Find nearest hospital
4. Find nearest police
5. Find nearest hospital then police
6. Show the current map
0. Exit
Select an option : 4

Where are you? Enter the coordinates : 7 19
Nearest police station : <7,18>
Distance : 100.00 m
```

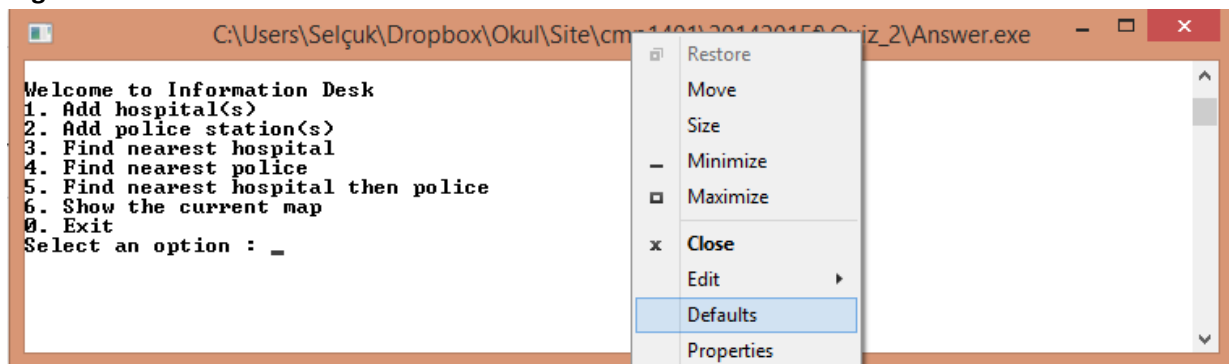

A screenshot of the same application window showing the third test case. The user has selected option 5. The program prompts "Where are you? Enter the coordinates : 4 16". The output shows "Nearest hospital : <10,13>" and "Nearest police station : <14,13>".

```
Welcome to Information Desk
1. Add hospital(s)
2. Add police station(s)
3. Find nearest hospital
4. Find nearest police
5. Find nearest hospital then police
6. Show the current map
0. Exit
Select an option : 5

Where are you? Enter the coordinates : 4 16
Nearest hospital : <10,13>
Nearest police station : <14,13>
```

INSTRUCTION FOR EXE FILE: To see the examples better do the next instructions

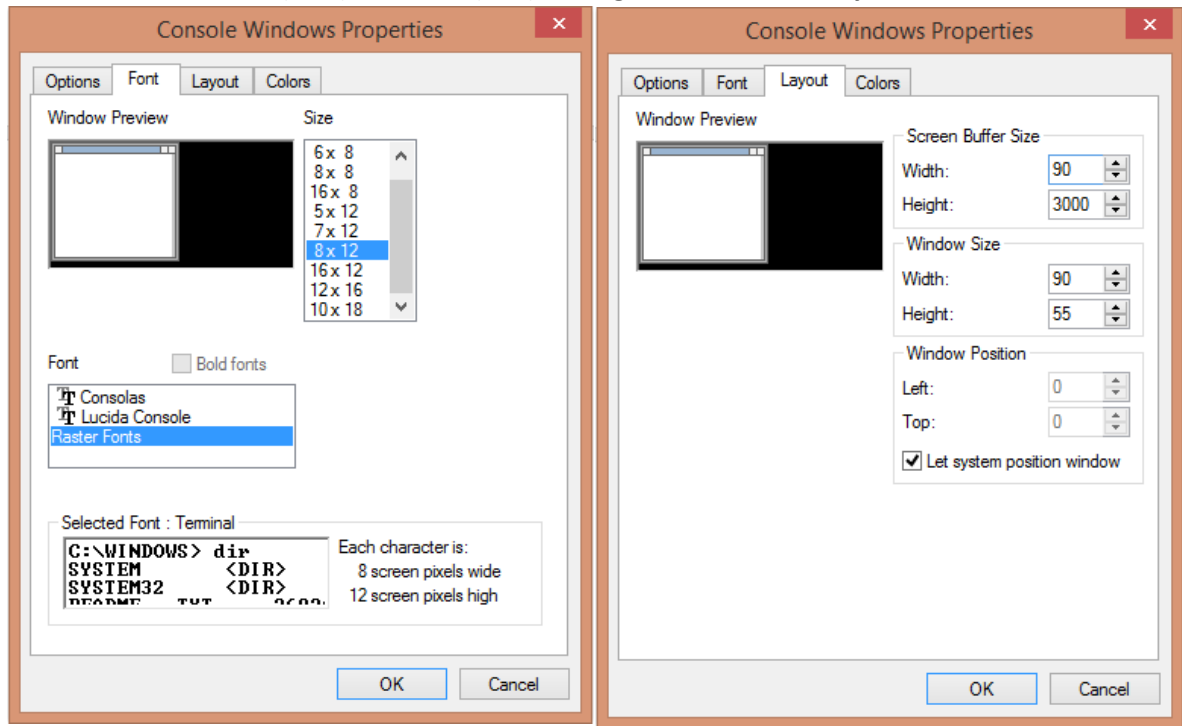

1- Right click on the window and select Defaults

THE HOMEWORK IS DUE BY 11:59 pm THURSDAY, 15th JANUARY 2015
